MCP Client

Stackgen MCP Server
- ✅ Blueprints
- ✅ Compliance
- ✅ Governance
- ✅ Infra Management

Providers

INTEGRATIONS
aws · Azure · Google Cloud · · · GitHub · GitLab · · · Helm · Terraform · · Prometheus · · · · · Wiz

Key Outcomes

Natural Language Infrastructure Management
Use **conversational commands** to create, deploy, and manage cloud infrastructure—no CLI memorization required.

Enterprise Governance Without Bottlenecks
Deploy at **developer speed** while **enforcing** security policies, compliance rules, and resource restrictions.
Deploy Infrastructure in Minutes, Not Days
Transform deployment cycles from days to minutes—cut infrastructure provisioning time by **60-75%.**

Code in Your IDE, Deploy with Confidence
Deploy infrastructure using Claude Code, Cursor, VS Code—directly from your existing development tools.

USERS	WHAT
App Developers	**Deploy Production Infrastructure:** Instead of waiting 3-5 days for platform tickets, deploy infrastructure for apps **within minutes** via natural language, cutting deployment cycles from days to minutes.
Platform Engineers	**Self-Service Blueprints: Eliminate 70% of tickets** by publishing pre-approved AppStacks that developers deploy via natural language while automatically inheriting your security policies and compliance rules.
Site Reliability Engineer	**Automated Drift Detection:** Catch emergency console changes in minutes instead of during the next outage by comparing deployed infrastructure against AppStack definitions and reducing **MTTR by 50%.**
DevOps Engineers	**Automate Compliance:** Cut audit preparation from **weeks to hours** by uploading SOC 2, HIPAA, or GDPR policies as code that automatically reject non-compliant configurations before they're created.
