

Meet Aiden, Your AI Agent for AWS Operations

REDUCE TOIL. SHIP FASTER. IMPROVE UPTIME.

Reducing engineering toil across the full infrastructure and operations lifecycle - safely, at scale.

TRUSTED BY

90%

IAC TOIL REDUCTION

Deploy infra at AI coding speed

30%

TICKET REDUCTION

AI agents solve tickets on your behalf

50%

MTRR REDUCTION

Intelligent alert triage, RCA and remediation

40%

O11Y COST REDUCTION

Reduce manual effort and surprise bills

The challenges every engineering team faces

Devs ship in hours. Ops still takes days

- Kiro ships in hours — infra still runs on ticket queues
- Faster shipping makes ops backlog worse
- Every deploy expands compliance and drift exposure

Alert Fatigue & Slow Recovery

- SREs get 400 alerts a day — 90% are noise
- MTRR reaches hours across CloudWatch, Grafana
- Root cause is a manual archaeology project

Governance & Compliance Gaps

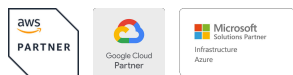

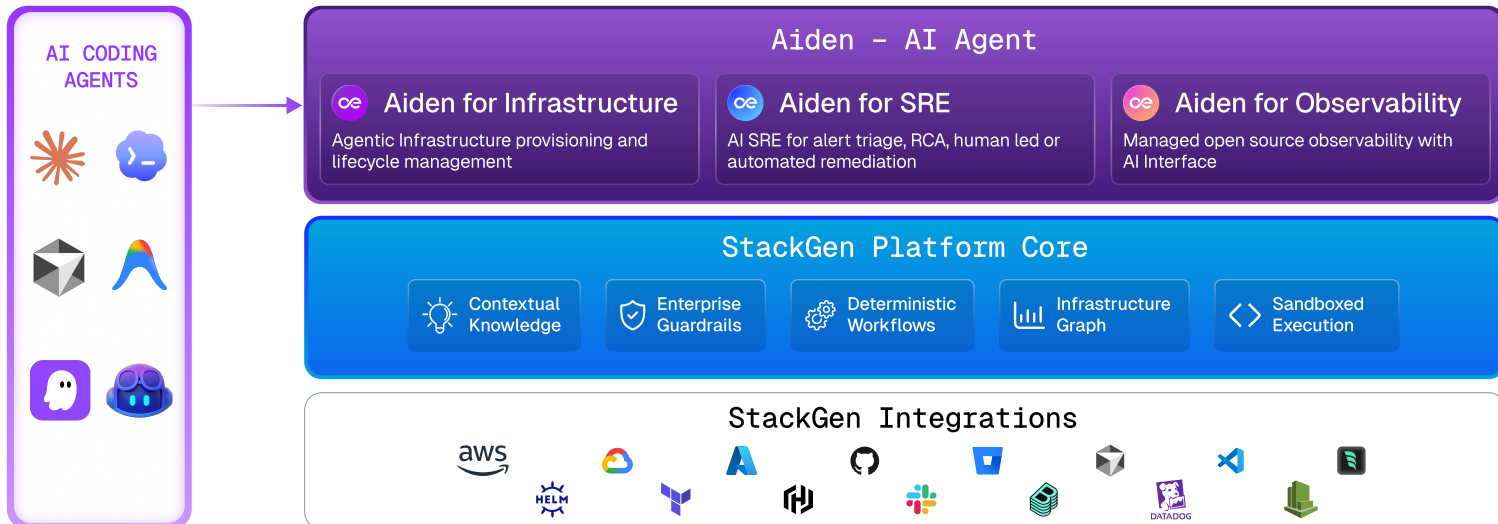

- Policy-as-code mandated — but inconsistently enforced across AWS services
- SOC 2 infra audits keep you up at night
- Multi-day forensics to identify change history

Observability Cost & Toil

- Self-run Prometheus/Grafana/ELK takes 2-5 FTEs
- Per-host pricing generates billing surprises
- Commercial vendors double your bill at renewal

AI wrote your code. Aiden runs your ops

StackGen is the AI operations platform built for AWS. One agent, Aiden, covers your full engineering lifecycle: infrastructure provisioning, SRE and incident response, and observability.

Aiden for Infrastructure

Stop choosing between fast and compliant

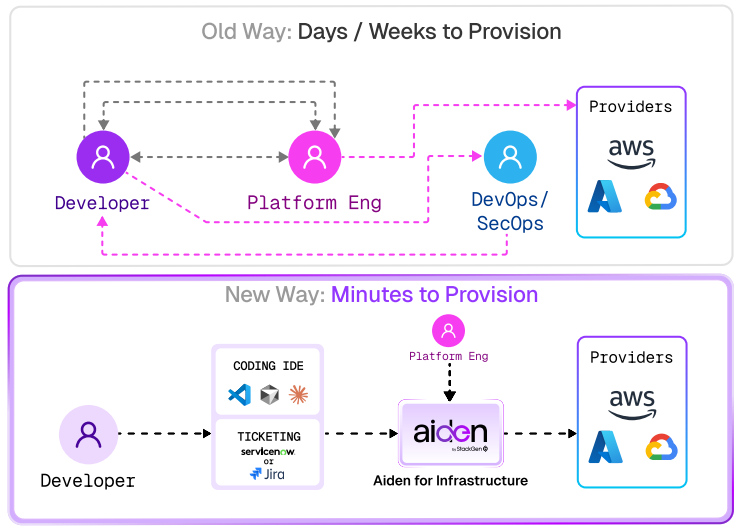

- For developers: Express infrastructure intent in your IDE — Amazon Kiro, Copilot, or Claude Code — and Aiden generates governed, compliant Terraform and deploys to AWS automatically. No YAML. No tickets.
- For platform teams: Define golden modules, policies, and guardrails once. Aiden enforces them on every deploy, detects drift continuously, without manual audits.

4x
VELOCITY

100%
INFRASTRUCTURE STANDARDIZATION

100%
DRIFT DETECTION

Compliance
FOR NIST, SOC2, GDPR, PCI, MARS-E & MORE

Aiden for SRE

Less toil. Faster recovery. Your SREs, amplified.

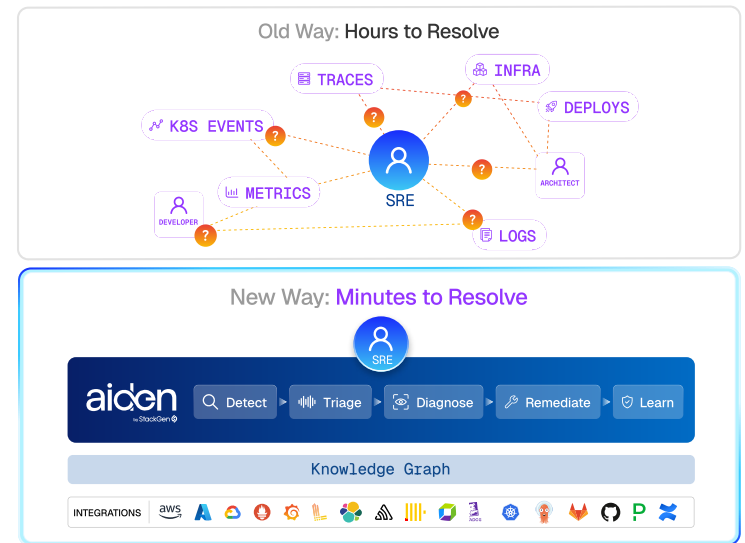

- Triage 400 daily alerts down to the handful that matter — automatically
- Five-step flow: triage, SLO prioritization, RCA, human-approved fix
- Native integrations: CloudWatch, PagerDuty, your existing stack
- Never acts without sign-off — full audit trail always

50%
REDUCTION IN MTTR

90%
LESS ALERT NOISE

50%
FASTER DETECTION

75%
LESS OVERHEAD

Aiden for Observability (with ObserveNow)

Your monitoring stack shouldn't need its own on-call.

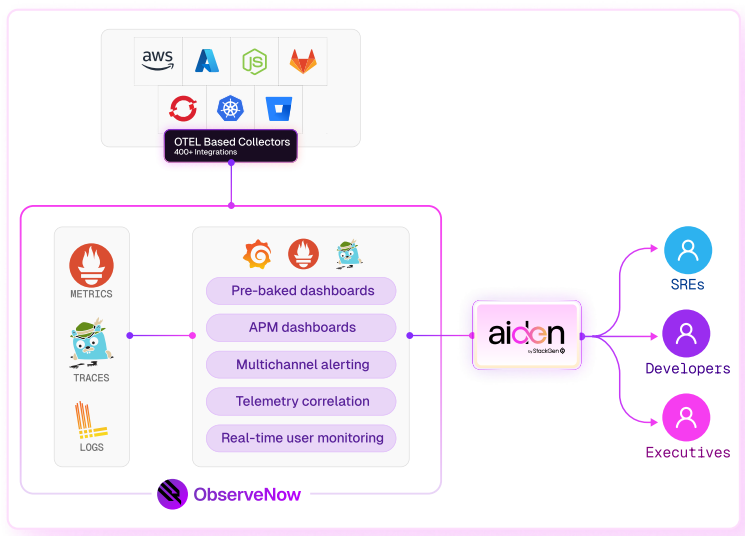

- Drop-in Prometheus remote-write — no re-instrumentation required
- Native PromQL — your team's skills carry over on day one
- Aiden AI correlates signals to accelerates RCA
- Predictable ingestion pricing — no per-host traps, no cardinality surcharges
