Aiden for Platform Engineer

Add agentic capabilities to your DevOps tools

StackGen

Nielsen · INMOBI · NBA · CHAMBERLAIN · AUTODESK · Lexmark

10x Velocity
Deploy infra at AI coding speed

100% Compliance
Shift-left guardrails, auto-enforced

35% Incident Reduction
Catch misconfigurations before you deploy

	TOOLS	WHAT	PROMPT
BUILD	IaC Creation	Create infrastructure deployments based on the app requirements with built-in guardrails	"Give me the right infrastructure for my new payment service"
GOVERN	Governance	Apply entire governance sets to deployments	"Apply APAC related rules to this project"
	Custom Policies	Create custom policies and enforce them in your deployment	"Create a custom policy for EU users with these rules"
	Compliance	Return list of resources compliance violations and fix them	"Which deployments have compliance violations right now"
	Module Catalog	Create IaC modules and apply them to deployments	"Create 'static-content-repo' module that exposes 'ContentPath' and 'EnableCDN'"
HEAL	Drift Remediation	Return list of deployments that have drift and provide remediation recommendation	"Return list of deployments that have drift"
OPTIMIZE	Shift Left FinOps	Assess infrastructure for both cost and performance improvements	"Optimize my AWS costs for this deployment"

INTEGRATIONS

aws · Azure · Google Cloud · · · GitHub · GitLab · · · HELM · Terraform · · · · · · WIZ

Old Way: Days / Weeks to Deploy

Developer — Ticket Request (Jira, slack) → DevOps
Architecture Iterations
Infra as Code Iterations → SecOps → Providers (aws, Azure, Google Cloud)
Compliance Check
Remediation Requests
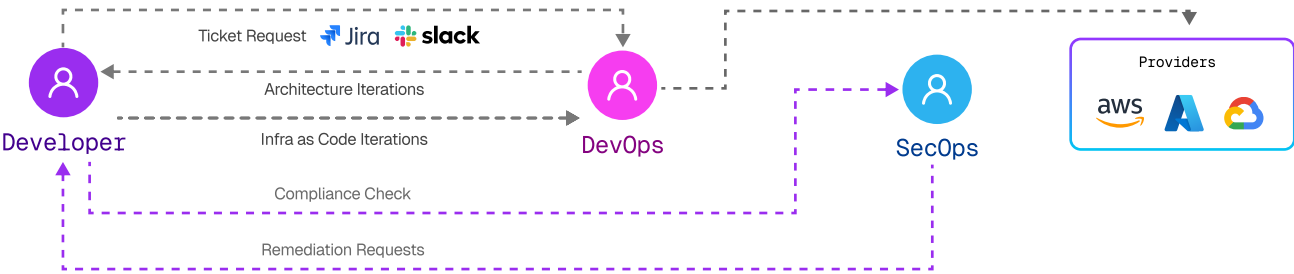

New Way: Minutes to Deploy

IDE/IDP/UI → Developer → **aiden** by StackGen → Providers (aws, Azure, Google Cloud)

- ✓ Modules
- ✓ Compliance
- ✓ Governance
- ✓ IaC
